Disease effects and model dependence are separate evidence

B

Model predictive dependence

NOT ESTIMATED

Validation ROI-history permutation ΔMAE was blocked by checkpoint provenance.

Mismatch fields: merged_sha256, resolved_source_map

Saved merged SHA-256: 2a2ba7de5415900b…

Saved medication source: medication + OnMedication
Current medication source: On medication? + OnMedication

No model-importance values are plotted or inferred.

Panel A is an adjusted group association; Panel B records a provenance-blocked model analysis. Neither panel implies causality.
